never smoke or cause unpleasant odors-no soot or ashes to bother with. A match is all the kindling you need, a simple turn regulates the heat-never too hot, never too cold-always just right.

Be careful to use the right kerosene, though. Ordinary kerosene won't do! The kind to look for and insist on getting is called Rayolight Cil. Highly refined and perfectly purified, it burns without sputter or charring the wick. Buy it where you see the sign; "Atlantic Rayolight Oil for Sale Here.'

## War Times Conserve Your Food

The public should be interested in Food Commissioner Hoover's instructions and every person should do all in their power to follow his advice in saving food, every family should have wheatless days, numerous wheatless meals, meatless days, and wasteless days. If you do your bit in conserving food and carrying out the instructions of Colamissioner Hoover, there will be an abundance for the Allies and everybody else, but if the extravagant use now is continued there is going to be, soon, a great shortage in this community. Flour is already being sold under an embargo, and it is almost impossible to get sugar, other lines of staple foods are equally scarce. Heads of families must look this thing squarely in the face and out out luxuries, and reduce their consumption to necessities. Conserve the food, reduce your purchases-we must win this war.

It is my first real engagement and I am ready for more, and all the rest of the crew 'eel the same way about it. If the raider had seen a ship alone, it would have been 'Good night, ship,' but she ran into something that surprised her. She could only make, I judge, about 10 knots and we can do a little beter in case of emergency. At 10 P. M. we were steaming along as if nothing had happened, for everything had

quieted down.
"October 18.—Everything is fine now at 8 A. M. but at 10 A. M. the sea starts to kick up and get mad. We are now leading into a heavy sea and she sure is raining. You can not see the foc's'l from the bridge. i' is so heavy and blowing so. We are now zigzagging on account of being in the war zone and are not taking any chances of getting into a mixup with submarines in this weather. We had 18 of our convoy at 7 A. M. this morning and I hope it keeps up for will have the record it we get 18 of them safe through the war some

"October 19.—Fine night last night, and at 10 A. M. it is just glorious and it could not be better for periscopes. The sun is shining so strong that it harts your eyes on account of the relisting on the water. We get a radio Will Positively Relieve Pain Almost last night at about 11 A. M. that there is a fleet of submarines in our vicinity and we are sure keeping a sharp look-out for them. Where we are now they have been sinking and playing havor in the last few days, but look out if we happen to see them arst. We got word that one of our torpedo hoats was hit the other day here by a torpedo from a submarine. We have 17 of our convoy this morning and

all doing nicely.
"October 20—Everything is fine at 12 A. M. and the weather is clear as glass and a sea is running sor of high. It's dark here now at 4:30 and this is what happened about 5.15. We were cruising around waiting for our other convoy to meet us and zignag-gung all the time. We have gone some distance and are waiting around voz when all of a sudden we heard an awful explosion astern. Right away the convoy astern signaled she had been hit by a torpedo in the or-ward hold. We at once hoisted the submarine warning flag and signa.led to the other ships to look out. We then circled around in the direction of which she had been hit, which was on the port side, but could see nothing, owing to it being too dark. We sent the convoy on ahead on a differant course again and scouted around to see what we could see. But without effect, pwing to the darkness. In about two hours, we came up with our convoy again, but nothing had our convoy again, but nothing had happened to any of them, and the one hit said she could get along all right. Being she was hit forward it hid not do much damage, only to her cargo, which was valued at about \$500,000. Her water tight compartments will keep her affoat and her engines were not damaged at al'lucky for her. Four of her crew wer injured, but she said she could take cars of them.
